

Corner Protector

Equipped with Velcro,
Easy to install

270 degrees maximum right
angle protection, Effectively
avoid damage caused by accidents

Vehicle collisions are a common problem in warehouse systems. The blown anti-collision corner is blow molded from the original LDPE material to prevent the forklift from hitting the shelf in the operating area, thereby reducing or eliminating damage to the corners and the vehicle. Wear resistance and flexibility provide effective protection for vehicles and buildings.

Features:

- 1, Velcro fixed, easy to install and remove;
- 2, bright yellow provides a good visual reference for the driver;
- 3, durable, high quality assurance;
- 4, effectively prevent damage caused by forklifts or personnel exchanges, and economically and effectively improve the safety of the warehouse;
- 5, 270 degree protection for maximum protection.

Model	Length	Width	Height	Weight
